

Selected as NPL for Microsoft's Azure DataMarket

ParcelAtlas.com, patented technology, is industry's longest running, most current, online national parcel layer. Just LOGON and start reducing all your property transaction costs, immediately at first, then much faster. Powered by BSI's US Postal Service compliant National ParcelMap Data Portal (NPDP) content, ParcelAtlas offers an intuitive user interface for convenient lightening fast performance. Packing four different address location protocols, you will always find your parcel boundary. Payment schemes range from per transaction on Microsoft's DataMarket Azure platform to unlimited transaction passwords on Bing platform.

SPECIAL FEATURES

- Most Current in Industry. Daily posting of updates to keep all content possible less than 12 months old.
- May be used by the transaction on Microsoft's Azure DataMarket platform.
- May be used direct from BSI over Bing map and imagery layers.
- Parcel boundaries come with situs, characteristics and owner information included.
- All content is directly from county governments, no third party.
- Metadata records include version, completeness and percent situs, owner and characteristic attributes.
- Thematic mapping and buffer analysis are standard spatial analysis features.
- Robust API for rapid integration with legacy geospatial operations on any platform.
